About Me

I am a passionate and dedicated computer engineering student with a strong foundation in programming, problem-solving, and innovative thinking. My career goal is to contribute to cutting-edge technology projects that positively impact society. I am highly motivated to learn and apply new technologies in real-world scenarios.

Education

Bachelor of Science in Computer Engineering

University of Ruhuna, Sri Lanka

Expected Graduation: [Year]

Achievements: [List significant academic achievements here]

Projects

1. AI Plagiarism Detection Tool

- Description: Developed a system to identify plagiarism and detect AI-generated content in academic assignments.
- Technologies: Python, Machine Learning, Django.

2. Maritime Surveillance Software

- Description: Designed a system for real-time analysis and alerting of maritime activities using AI.
- Technologies: AIS, EO/IR, Databases, Python.

Skills

Technical Skills:

- Programming: Python, C++, Java
- Tools: Streamlit, Django, Git

- Databases: MySQL, MongoDB

Soft Skills:

- Leadership
- Communication
- Team Collaboration

Achievements

- Successfully organized and conducted a webinar on freelancing for undergraduates.
- Recognized for excellence in team collaboration during university projects.
- Completed a certificate course in Business English from the University of Colombo.

Extra-Curricular Activities

- Member of IEEE Student Branch, University of Ruhuna.
- Active participant in the Rotaract Club, University of Ruhuna.
- Volunteered in various community service projects and leadership camps.
